

Thinner Facer + Thinner Liner = Savings

Green Bay Packaging has two new thinner films that can reduce costs for you, and benefit your customers.

- 2.4 mil white top coated Label-Lyte™* film (024TL)
- .92 mil polyester liner (92NB)

Green Bay Packaging’s 2.4 mil white top coated BOPP (024TL) is the same Label-Lyte™* material you have trusted for years – just a bit thinner. So you can expect the same results.

- Same pearlescent look.
- Same converting characteristics.
- Same printability.

Using these thinner components can save you shipping costs. Here’s one example.

Weight Per MMSI with 102 Adhesive

	2.4 Mil Label-Lyte (024TL)	2.6 Mil Label-Lyte (026TL)
.92 Mil PET Liner (92NB)	139#	144#
1.2 Mil PET Liner (12NB)	152#	157#
40# Kraft Liner (40SC)	188#	194#

Thinner components also mean more labels on a roll – saving your customers roll changes during application.

Length of a 12” OD Roll with 102 Adhesive

	2.4 Mil Label-Lyte (024TL)	2.6 Mil Label-Lyte (026TL)
.92 Mil PET Liner (92NB)	2,043’	1,904’
1.2 Mil PET Liner (12NB)	1,948’	1,821’
40# Kraft Liner (40SC)	1,509’	1,432’

A variety of thinner options are available on our [T.I.P. program](#). For samples of our thinner products send us an [email](#).
